IMPORTANT NOTICE

Green Worx CS contends that this product is manufactured according to and conforms to the terms and conditions as stipulated in SABS/TC 1006/SC 02 "Detergents, soaps, cleaners, degreasers and oil spill dispersants and absorbents" including SANS CD 1604ED1.1:Biologically enhanced cleaning and degreasing products.

Bio Tech - Probiotic Kennel and Bedding Wash - "Clean on the Outside - Healthy on the Inside"

Bio Tech Probiotic Kennel and Bedding Wash is a **scientifically formulated**, man, animal and environmentally friendly blend of enhanced ingredients to deep clean your pet's kennel and bedding eradicating and malodour.

What are Probiotics?

Probiotics are beneficial microorganisms that are believed to provide health benefits. Several mechanisms of action have been proposed to explain how probiotic organisms act within a host to yield beneficial effects:

- First, they are thought to work to promote digestive health and maintain digestive balance. By replenishing and maintaining healthy intestinal flora, harmful microbes are naturally reduced.
- Second, they are thought to provide immunomodulation of the host by increasing antibody or cytokine production, modulation of phagocytosis, and by stimulation of nonspecific immunity.

As dogs occasionally groom themselves and lick their paws, the act of self-grooming allows intake of these beneficial microbes, thus contributing to a healthier gut, and modulation the host's immune system.

The probiotic microbial consortium used in Bio Tech Probiotic Kennel and Bedding Wash contains a minimum of *60 million colony forming units/ml* that work directly on the outside by consuming debris and animal body secretions to keep animals healthier; promoting healing of rough, flaky, oily, or irritated skin and fresh odour free bedding.

Do Probiotics simply wash off when the kennel or the bedding is rinsed?

No, the microbial consortium utilized in Bio Tech attach themselves to the hard surfaces leaving sufficient numbers (through electro-chemical bonding) to allow them to adhere to the coat of dogs. Each ml of Bio Tech Probiotic Kennel and Bedding Wash contains approximately 60 million colony forming units of beneficial microbes, all of which are unique bio-level safety one DNA finger-printed microorganisms.

Calming Fragrance.

The specially formulated fragrance in Bio Tech Probiotic Kennel and Bedding Wash has a known calming and mood-lifting effect experience following washing when the animal enters a clean kennel with clean bedding.

Biodegradable

All cleaning ingredients are made from natural and or organic natural raw materials, which are readily biodegradable.

Ingredients

Contains a proprietary blend of special ingredients; plant based surfactants, Probiotics and numerous other proprietary ingredients to deeply clean and condition your dog's kennel and bedding.

Product Features and Benefits

- Scientifically Formulated Probiotic Kennel and Bedding Wash
- Hypoallergenic
- Calming, mood lifting fragrance
- Safe plant based surfactants to deeply clean and remove soiling.
- All probiotics contained in this preparation belong exclusively to the genus Bacillus. These strains are non-pathogenic to plants, animals or humans.
- Probiotics are designated Class 1 according to Council Directive 90/679/EEC (as amended by Council Directive 93/88/EEC) and all other recognised classification systems for microorganisms.
- 2 year shelf-life
- Biodegradable ingredients in the formulation
- Sulphate Free. Does not contain any animal derived ingredients
- pH adjusted formula.
- Shelf-life: - Two years; maximum loss of 1.0 log at recommended storage conditions
- This special formulation does not contain bleach and cleans thoroughly, is gentle on the skin, lathers richly and the pH is neutral.

How Should I Use Probiotic Kennel and Bedding Wash?

- Wet area to be washed
- Spray generously onto all surfaces and wash with a soft cloth
- Rinse well. ...
- Air-dry. ...
- Reward your dog.
